

GEOBOUNDARIES 4.0

The largest open-license database of administrative divisions

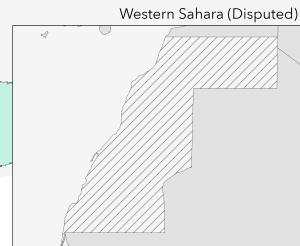

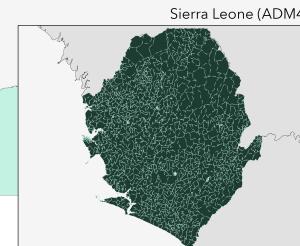

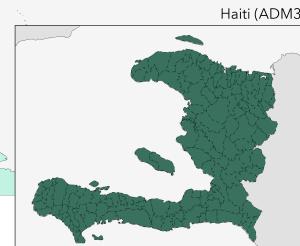

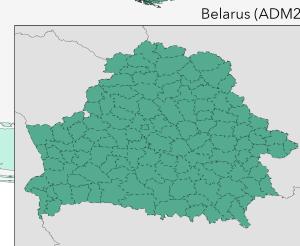

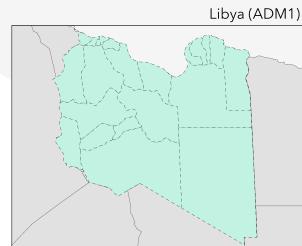

In many countries, there is limited information on where one legal state ends and the next starts. The geoBoundaries team of the geoLab at W&M researches, collects, and standardizes this information for integration into the geoBoundaries database (geoboundaries.org), used by thousands of users across the globe. The database is currently the largest open-license global administrative boundary dataset available, containing up to 5 levels of administrative boundary information for every country in the world.

Administrative Divisions (ADMs)

■ 1* ■ 2 ■ 3 ■ 4+ ■ Disputed

* ATA and VAT only available at ADM0

Special thanks to Dr. Daniel Runfola, Community Contributors, and the geoBoundaries team: [v4.0: C. Altman ('22), R. Biddle ('23), H. Buckman ('23), H. Day ('23), D. Fornatorta ('23), J. Habib ('21), S. Horn ('22), J. Lin ('22), T. McLaughlin ('23), D. Miller ('22), S. Murphy ('22), K. Pukiewicz ('24), R. Ritchey ('24), C. Rivera ('23), L. Rogers ('21), M. Roth ('23), I. Schruer ('23), N. Simpson ('22), N. Spage ('23), E. Topness ('22), L. Troup ('23), J. Turner ('22), S. Updike ('22)], [v2.0: A. Anderson ('21), M. Crittenden ('21), E. Dowker ('20), S. Fuhrig ('21), S. Goodman ('21), G. Grimsley ('19), L. Hobbs ('19), R. Layko ('19), G. Melville ('19), M. Mulder ('21), R. Oberman ('20), A. Peck ('21), L. Seitz ('17), S. Shea ('21), H. Selvin ('21), R. Youngerman ('19)]
